Registration Agreement

**READ CAREFULLY  
THIS IS A LEGALLY BINDING AGREEMENT**

In exchange for the opportunity to enroll at Tufts University, to receive education services, and to receive other goods and valuable consideration, I understand and agree to the following terms and conditions:

- I promise to pay all tuition and fees to Tufts University when due, including, but not limited to, tuition, mandatory fees, dining and housing fees, and enrollment related fees.
- I understand that failure to pay all sums when due will result in a hold being placed on my university account which will prevent me from receiving grades, registering for courses, receiving a diploma, or obtaining transcripts.
- I am personally responsible for payment of all sums when due, regardless of any grants, scholarships, or financial aid for which I may be eligible. In the event I become ineligible for any form of financial aid for any reason, I will be responsible for any additional balance that I may owe due to the cancellation or reversal of such funds, and in the event I receive a refund of my financial aid, and then lose my eligibility for that aid, that I will immediately return the refund in full and pay any additional balance due.

▼ NUTR-0208 **Human Physiology**

This course meets the physiology requirement for students in the following programs: Human Nutrition, Nutritional Epidemiology, Cell and Molecular Nutrition. This course will cover the functions of mammalian organisms as we understand them at various levels of organization - organ system, organ, cellular and subcellular levels. Our goal is to provide a working knowledge of the fundamental properties and regulation of these systems so that the student can understand and relate this material to that learned in other basic science courses with particular emphasis on those related to nutrition. Prerequisites: Undergraduate level introductory biology and chemistry and graduate standing or instructor consent.
